

KEYRACK LOCKER™

S-Biner[®]

The KeyRack Locker features the popular KeyRack Steel body with six S-Biner MicroLocks that are simple to attach, remove, and lock securely. It's the ultimate in functionality and durability while still providing easy access to your keys.

Made of high quality stainless steel, the KeyRack Locker features a sturdy, secure carabiner gate closure that allows you to clip your keys onto and off of belt loops, zipper pulls, purse straps, second key rings - anything with a loop or D-ring. But the bottom half is where it's at: the solid loop holds six S-Biner MicroLock, stainless steel carabiners that feature a center locking lever made of durable plastic. A simple twist effectively and securely locks the gate, and keeps it that way until you twist it open again. Versatile, convenient, and ultra-secure, the KeyRack Locker is great for removing a single key from a ring to take on a run or ride, give to your mechanic or valet, or leave for a friend..

- ⊕ The KeyRack Locker's innovative S-Biner MicroLocks combine the innovation and versatility of the S-Biner to provide unique functionality, security and access to your keys.
- ⊕ S-Biner MicroLocks feature a center lever made of durable plastic--a simple twist effectively and securely locks the gates to keep your key securely locked to the KeyRack Locker.
