## IDEA

Our Airback™ equipped Vina 40 pack is cleverly designed for back ventilation and easy access. Pockets and water are within easy reach on the go, and it's sized for demanding, short-length hikes.

## FEATURES

- Airback™ Suspension System, provides ventilation and airflow through the back contact zone.\*
- Available in size S/M and M/L suspension system.
- Full length zippered side opening for easy access to main compartment.\*
- Elastic side pocket with finger guide loops, reachable on the go.
- Zippered side pocket, reachable on the go.
- Large stretch pocket on front.
- Zippered pockets on hip belt.
- Attachment for trekking poles and ice axes.\*
- Hydration system compatible with internal sleeve and hose routers on shoulder straps.
- Fixed lid with one spacious pocket and key holder.
- Top compression strap under lid.

## FABRICS

210D Ripstop Polyamide

600D Oxford Polyester

\* See page 4 for more information.

## FEATURES

- Airback™ Suspension System, provides ventilation and airflow through the back contact zone.

- Full length zippered side opening for easy access to main compartment.

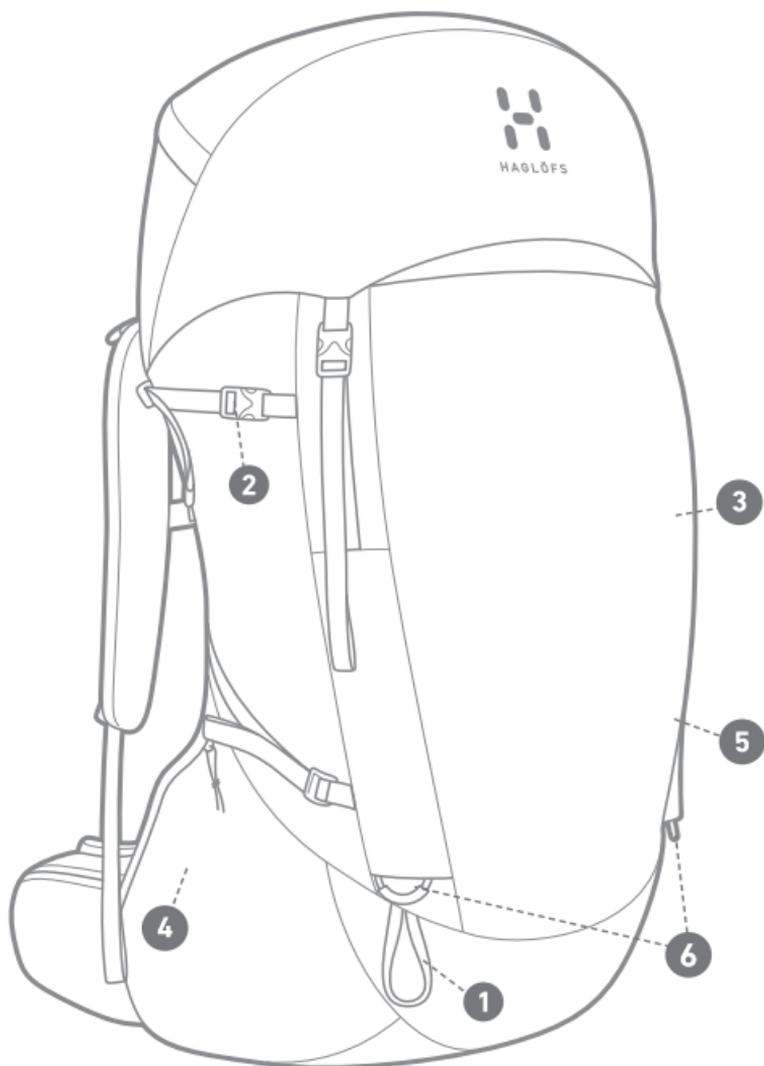

- Attachment for trekking poles and ice axes.

4. Airback™ Suspension System\* with ventilated back panel
5. Sternum strap
6. Hip belt
7. Waist strap
8. Hip belt pocket
9. Elastic side pocket
10. Side compression straps

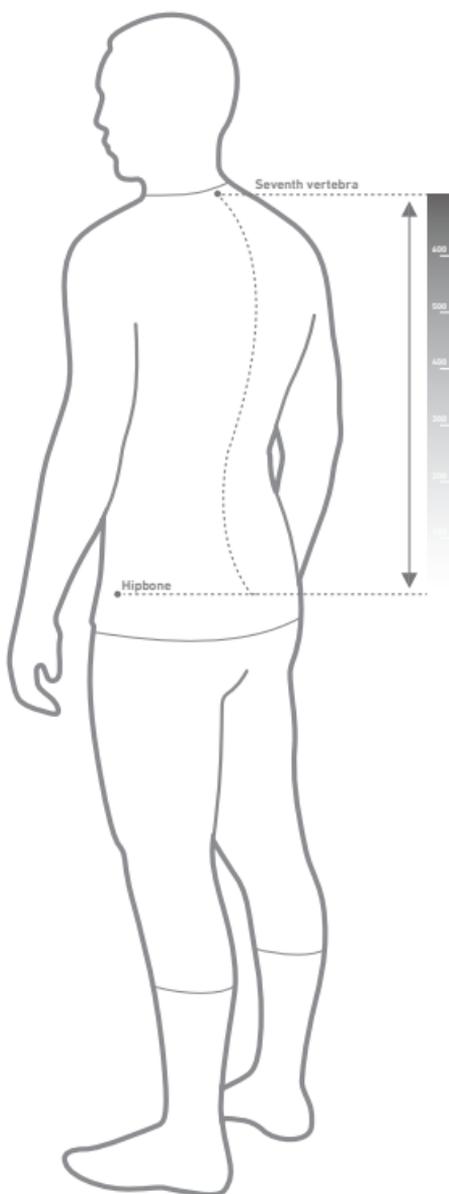

3. \* See page 8 how to adjust.

4. \* See page 7 how to adjust.

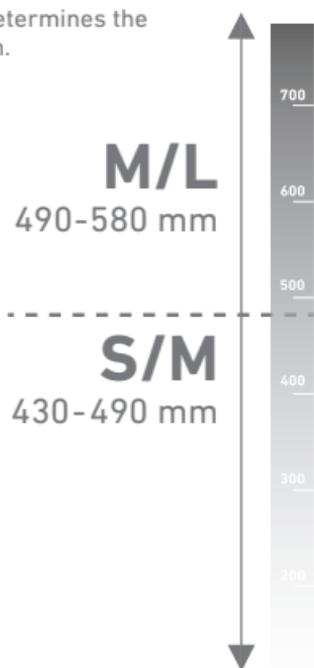

## SIZE GUIDE

1. Measure spine length as shown. Follow your spine between your hipbone and the seventh vertebra.

## SIZE GUIDE

2. The length of your spine determines the size of the carrying system.

3. After determining size, make sure that the **load lifter straps** are at the correct angle.

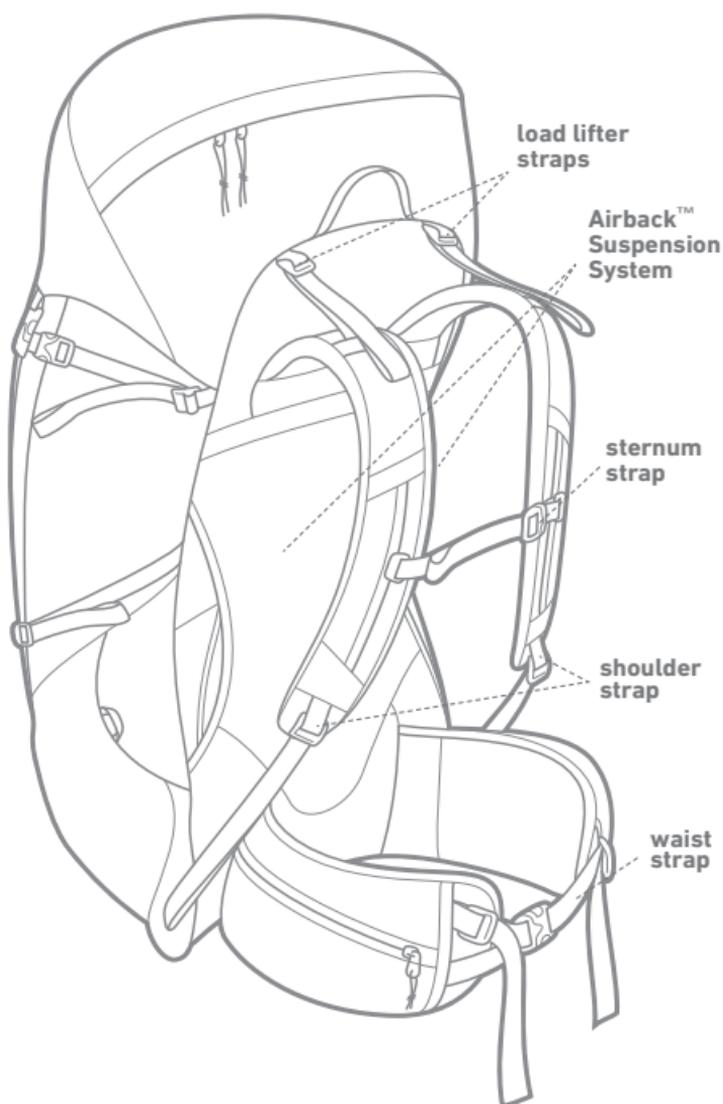

**Ideal Angle**  
10-30° 

**Load lifter straps**

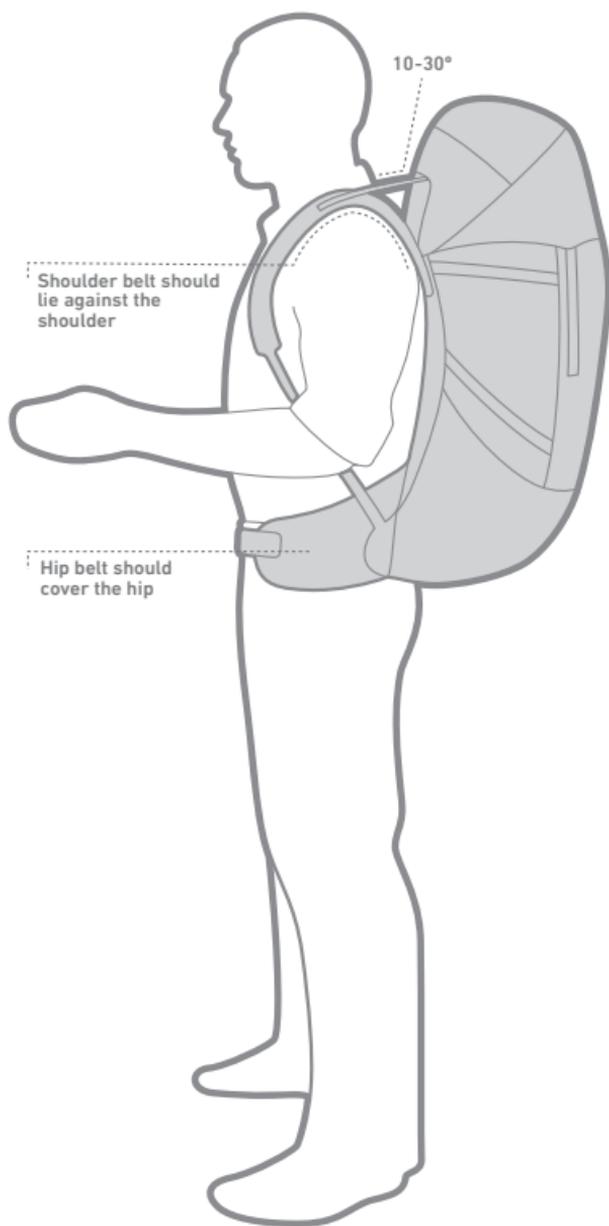

## 5 STEP ANATOMICAL ADJUSTMENT

- 1 Loosen all straps
- 2 Put on your backpack and tighten the **waist strap**
- 3 Tighten the **shoulder straps**
- 4 Button the **sternum strap** and adjust
- 5 Tighten the **load lifter straps**

## CARRY CORRECTLY

For long treks, it is important to carry correctly for more comfort and enjoyment.

## CARE INSTRUCTIONS

**Washing instructions:** we recommend hand washing in luke-warm water using a soap-based detergent. Do not use fabric softener. Loosen all straps, remove any detachable hip belts and wash the backpack in a bathtub or large sink. Rub the backpack carefully with a soft sponge and then rinse thoroughly. Hang the backpack to dry in a well-ventilated space, or outdoors away from direct sunlight.

**Miscellaneous:** we advise against using a washing machine and tumble dryer as parts of the backpack may come loose or catch and destroy both the appliance and the product. Most products can be re-waterproofed with spray-on waterproofing. Make sure that all of the metal parts of the product are thoroughly dry before storage to avoid corrosion. For long-term storage, keep the backpack in a cool, dry space.
