RAPALA® PROWEAR

ANY ANGLER who has spent an afternoon fishing in a cold, blowing rain knows the value of premium gear. The designers at Rapala ProWear have a first hand knowledge of these values. Their time spent on the water yields a knowledge for the needs of anglers in the elements. Built into every piece of ProWear gear are the features that are there when you need them most, providing safety, protection and comfort.

RAPALA PROWEAR Flotation brings the same dedication to function, quality and durability that have propelled this category to the forefront.

Rapala ProWear™ MATERIALS

Yarn and raw materials from the most respected suppliers guarantee the quality of our fabrics from the start. Throughout the manufacturing process a very strict quality control is maintained to make sure everything meets our high standards. High-tech finishes are the final seal that make all our fabrics excel at constructing the best quality clothing for the best fishing experience.

INNOVATIVE X-PROTECT® MATERIALS

X-ProTect technology adds complete waterproof protection to any fabric, while allowing comfortable breathability. A thin PU film laminated to the back of the outer fabric creates a completely waterproof surface. Moisture that forms inside is transported through the film and released to the outside.

WATERPROOF

X-ProTect fabrics are finished by laminating a thin PU film to the back of the outer fabric. This film is impermeable to liquid water. On a two layer construction the film is protected by a separate liner. On the waders and three layer fabrics the liner is laminated to the back of the film, creating a three layer construction.

BREATHABLE

The materials used to create the two and three layer X-ProTect fabrics are carefully selected to allow free moisture transfer through the entire fabric structure. This means moisture does not build up inside X-ProTect garments, which guarantees absolute comfort.

WATER REPELLENT

The outer fabric is finished to be highly water and dirt repellent. If the garment does get dirty and the water repellent finish seems to have worn out, the finish is easily revived after washing by tumble drying or ironing the garment at low temperature.

X-PROTECT 2L

- Two layer construction
- Soft and durable fabric
- Composition: 100% Polyamide with PU laminate
- Waterproofness: 10,000 mm (JIS L 1099 B-1)
- Breathability: 10,000 g/m²/24

X-PROTECT 2L OXFORD

- Two layer construction
- Abrasion and scuff resistant
- Used as reinforcement in critical hard wear areas
- Composition: 100% Polyamide with PU laminate
- Waterproofness: 10,000 mm (JIS L 1099 B-1)
- Breathability: 10,000 g/m²/24

X-PROTECT SOFT

- Stretch fabric with tricot mesh lining
- Soft and durable fabric
- Composition: 93% PES, 6% Spandex
- Waterproofness: 10,000 mm (AATCC 127-1998)
- Breathability: 4,000 g/m²/24 h (ASTM E96-1995)
