

WOMEN'S LINERS

ALL WOMEN'S SHELLS HAVE LINERS THAT ARE SPECIFICALLY DESIGNED TO SUIT THE FEMALE BODY SHAPE.

Women's liners are cut lower to accommodate women's calf shape. They also have a more open design for a more comfortable fit. The padding in the upper liner is very flexible to prevent any discomfort around the calf. The lining materials are very soft and comfortable.

Designed to make you want to put your foot in the boot.

THERMAL INSULATION

Dedicated thermal insulation: since insulation is especially important in women's boots, all our liners have specific thermal insulation in the form of THINSULATE®, THINSULATE PLATINUM®, MERINO WOOL, wool or polar fleece.

This liner has excellent thermal insulation thanks to the use of THINSULATE® and THINSULATE PLATINUM®. According to our laboratory-based thermal imaging studies, these technical fibres developed by 3M provide the best thermal insulation currently available on the market.

3M Thinsulate Platinum INSULATION

THINSULATE® PLATINUM:

This very thin fibre is used mainly in clothing thanks to its elasticity which supports freedom of movement. In a liner, it works ideally with the other materials to provide perfect foot support for great skiability.

3M Thinsulate INSULATION

THINSULATE®:

As a very thin fibre, it does not affect the technical properties of our liners, but enables excellent foot envelopment for great skiability.

MERINO WOOL + ECHO FOR LIFE

MERINO WOOL:

More than a thermal insulator, Merino wool is a natural thermal regulator. Its main qualities are:

- thermal control,
- soft feel,
- breathability,
- odour control,
- fast drying.

Used in the lining of ski boots, it provides very high thermal comfort in any conditions.

POLAR:

Polar fleece provides very good thermal insulation.

WOOL:

Familiar for centuries, natural wool is an excellent thermal insulator. It provides heat and comfort.

THE LINERS HAVE EITHER:

1. TOTAL THERMAL INSULATION

The insulator is all around the foot.

2. FOREFOOT THERMAL INSULATION

The insulator is around the forefoot in the toe area.

CUSTOM OPTISENSOR LINERS FOR WOMEN

The liners in the PURE range can be customised. After being heated in an oven, they can be ideally moulded to the shape of the skier's foot. See page 40 for more information about this process.

DEDICATED WOMEN'S CUFFS

The height of the cuff is significantly lower in comparison with a unisex cuff. The tulip-shaped rear section easily accommodates a woman's natural calf shape. It is less structured to take better account of female skiers' physiology.
