FLEX (1 softest - 10 stiffest)

The Salomon Flex Scale. From 1 to 10, this scale is a comparison between our products and is applied only for snowboard boots. Each products has the most efficient flex for its riding designation.

LINER FOAM

We use specific foam in our liners at strategic places, to improve the fit.

Classic Fit

Classic foam located in the sensitive areas of the foot.

Auto Fit

Self-molding foam that adapts automatically to the rider's foot. Flat & full-length, high-density memory foam, located in the sensitive areas of the foot.

Custom Fit

For increased comfort and max foothold, CUSTOM FIT has heat moldable foam strategically placed in the sensitive areas of the foot, shin, ankle, and heel.

Full Custom Fit

Heat moldable, multi -density foam through out the entire liner.

Full Custom Fit Pro

Heat moldable, multi-density foam throughout the entire liner with removable ankle inserts for an even more customized hold.

Self Gel

A Fusion exclusive. Dynamic fit foam that conforms to the shape of your foot throughout the day. As your foot changes (and it does) the foam changes. Self Gel uses this foam throughout the ankle area of the liner.

Self Gel+

A Fusion exclusive. Dynamic fit foam that conforms to the shape of your foot throughout the day. As your foot changes (and it does) the foam changes. Self Gel+ uses this foam throughout the ankle and shin area of the liner.

LINER CONCEPT

Our stitched engineered liners provide the appropriate amount of specific foam, at the right place. It provides the best fit on the market.

Feel Good

Cushy and secure. Inspired by our top-end liners, the Feel Good liner is engineered with multidensity foam encompassing the foot, including the footbed. The result is incredible comfort.

Balance

4 levels of construction based on the same design philosophy. Displacing liner lace pressure from the top of your foot, around the key holding areas of the arch and above the heel. Tightening the liner lace wraps the ankle firmly, yet comfortably, rather than on top of the foot.

Power

Power Liner locks your heel down with its unique anatomical architecture. We call it the king of support, because nothing rules over this full custom fit, multi-density liner. Removable ankle inserts allow for increased support. Remove one or both, and create your own customized flex pattern.

Power Exhale Liner

Our classic Power Liner adapted with Exhale features for “touring-ready” capabilities. Stitched with three mesh channels that run the full length of the liner, acting as moisture wicking agents for the most breathable liner possible. No more soggy feet.

Fusion

Want direct contact and increased board feel? Try our patented LCG FUSION LINER. LCG stands for Low Center of Gravity, it's engineered for the Fusion liner and is the secret behind the unique connection between the liner & upper.

Fusion Exhale

A liner with lungs? Meet the Exhale Liner – the first liner that breathes. Mesh channels and one-way valves flush out humidity by using the natural motion of your feet to circulate and channel air out of your liner and boot. The result? Always dry.

Halo Liners

Designed specifically for women from the sole up, the HALO Liners guarantee the best fit, softest touch, and extra toasty warmth where women need it, in two exclusive levels. All day warmth and comfort, for a woman's foot.

LACING SYSTEMS

Liner Lace Locker

With just one pull and a flick of the switch, you are surely locked in for a comfy and secure ride. Once you're in, further micro-adjusting is a snap—Simply pull the inner lace to open the lock, pull it tight and lock it up.

QuickLock

Our simple and effective quick lace option for stress-free support. A single locker on the tongue and an evenly distributed lace path ensures a full wrapping and supportive feel from the first chair all the way to après-shred—all with one easy pull.

PowerLock Pro

A Salomon standard, redefined. The soul of our well-known lacing system has been given a new lease of life with a bombproof criss cross locker on the tongue and anti-catch hooks on the upper. A truly powerful and easy system that can handle anything on the mountain.

ZoneLock

The dual zone brother to our QuickLock lacing—ZoneLock offers a lower locker on the side of your boot in addition to our locker on the tongue. Customize your fit, one zone at a time with optimal wrapping support and outstanding heel-hold.

BOA Coiler

Easy and quick—tightens with the flick of your wrist. Don't waste any time getting to the chairlift.

STR8JKT

Lock you feet down with supreme comfort—STR8JKT features an additional inner heel harness for a no-heel lift ride and optimal comfort.

POWERLOCK PRO + STR8JKT

The bombproof criss cross locker of PowerLock combined with the supreme heel hold of STR8JKT for a powerful system that keeps your feet locked in no matter what terrain you're riding.

QUICKLOCK + STR8JKT

Rapid fire lacing—The simple one-pull system of QuickLock combined with STR8JKT for a super easy and comfortable fit you can keep locked down from first chair to apres' shred festivities.

Wrap Lock

Three power panels and a fused liner form to your foot in one single pull of the lace. In one motion your foot is wrapped in a low-profile, running shoe inspired boot.

UPPER

Mono Tongue

Lacing made easy for kids. Thanks to our mono-tongue construction, you only have to lace the upper part of the boots. Whether it's kiddo or Dad lacing the TALAPUS, it's easier! The simple upper construction allows the boot to deliver a smooth and comfortable flex, in addition to the ease of use.

Breathable Valve

Jumping, landing, jibbing and walking all generate internal air pressure from the compounds of your liner. Left in the boot, this air pressure will break down your liner and decrease comfort. Fusion boots feature a one-way BREATHABLE VALVE to exhaust old air, while keeping moisture out.

3D Motion Flex

A Pledge exclusive—360° mobility of the ankle area for maximum tweakability while maintaining ample support.

Reflex Construction

Kiss pressure points and weird outer deformation goodbye with Reflex Upper Construction, featuring a cuff design that moves naturally from heel to calf. Hike a jump, build a backyard jib, or cruise groomers—Reflex is made for smooth moving power, in and out of your binding.

OUTSOLE

Stomp

Grip with style—The Stomp sole is made of rubber, for maximum grip, support, and balance for a confident ride.

Easy

Grip with style—The rubber/EVA Easy sole provides the right support and balance for a confident ride.

Funk

Thick EVA loaded outsole for bomb drops and frozen cement landings—The FUNK has pillow soft protection and maximum comfort.

Aero

Available on the F4.0, the Aero began life as a super lightweight running shoe sole for riding. An extremely lightweight design, impact absorbing capabilities, with an ultra thin construction that provides perfect board feel.

Trinity

A unique version of the Lo-Fi, with extra emphasis on board feel, and an articulated exterior shape for seamless connection to our women's last construction.

Lo-Fi

The Lo-Fi is our low profile designed outsole, inspired by our favorite skate shoes—Strategic, dual EVA dampening, combined with rubber for extra grip.

Flightweight

One of the lightest outsoles in our range—The new EVA/ rubber compound outsole is specifically engineered for an extremely lightweight, cushiony, and low-profile freestyle feel.

Spring

The ultralight Spring outsole is soft where your foot needs to flex, yet stiffer on the sides for stability and balance. Dual density EVA, with thin rubber side stabilizers deliver dampening and transmission for any type of riding.

Empire

The Empire offers a street shoe aesthetic, but with on-hill performance hidden all over. The comfortable EVA foam is given a unique wave shape, which promotes natural movement, offers unmatched dampening in the heel, and a thinner forefoot for increased board feel.

Engraved Boot Size (Rental)

Time saver.

FOOTBED

Classic Footbed

Standard sole.

Mystic Footbed - Relief through reflexology

The only antimicrobial footbed in snowboarding that increases blood circulation, prevents fatigue, and embodies natural healing from the bottom of your foot to the top of your head. Better smelling feet are one step away with Mystic's Bamboo based anti-microbial powers.

Conform'able

Immediate perfect fit. A pre-shaped footbed with foot stabilization and patented arch flex support for improved pressure distribution.

FEATURES

Heel Grip

Specific Cat-Tongue material around the heel, so your socks are perfectly gripped into the boots for a comfortable increased heel-hold.

Wash & Wear

Wash it, just like your favorite tee. Our design process that uses new materials & specific construction that does not call for glued seams, so you can wash this liner without any deterioration.

Easy-in

Easier and faster to get in. Featuring a gliding patch that is placed at the entrance of the liner for heel glide and easier entry.

Integrated Heel-Strap

A MALAMUTE™ exclusive! An adjustable internal heel strap locks your liner to the boot sole for a precise power link and better support.
