

X-COUNTRY

Real racers always want to improve by getting better and faster. Result: We radically revised Racing Ralph for the second time - with PaceStar Compound and a completely modified profile. Also the hard numbers show how ambitious we were:

Carcass	127 EPI
Weight	-30 g
Rolling resistance	-20%

In addition the modified profile and PaceStar compound provide even better control.

29ers have a much larger contact area. For the first time the arrangement and proximity of lugs on the new Racing Ralph have been specially adapted to this greater contact area. It emphasizes even better the advantages of a 29" - rolling resistance and grip.

! Also available as a hand-made tubular tire in 26" and 29"!

Speed	Grip	Protection	Durability
