

PACK CARE

Osprey recommends Nikwax™ products for pack care. For complete instructions on cleaning your pack, visit: www.ospreypacks.com/PackTech/PackCare

Your pack is an extremely durable product built for years of use and abuse. However, some basic procedures will ensure that your pack holds up optimally.

- After each trip be sure to clean out your pack thoroughly.
- If it's wet, hang it to dry.
- Loosen all the straps.
- Wash your pack every now and then. [Do not immerse travel packs with our High Road™ Wheeled Chassis.]

CARRY-ON LUGGAGE

The Meridian 22" / 60L complies with the maximum legal carry on size specifications as required by most U.S. airlines. TIP: When placing these bags in the overhead compartment, stow retractable handle first as advised by most U.S. airlines (not wheels first).

GUARANTEE

At Osprey, sustainability is designed into our packs, which are built to last a lifetime and backed by a superb guarantee, no matter how hard you are on your gear. Visit www.ospreypacks.com for details.

Key Fabrics

- 420D HD Nylon Pack Cloth
- 1680D Ballistic

Shared Features

High Road™ Chassis

All Osprey wheeled travel packs utilize Osprey's proprietary High Road™ Chassis. It features **A** an ergonomic retractable handle with integrated vent fins, **B** 6061 T6 Aluminum Frame, **C** ultra-durable and lightweight composite base with a fiberglass matrix inlay and integrated foot/grab handle, **D** oversized, high traction polyurethane wheels with sealed bearings and **E** a high clearance design.

Convertible Backpack-style Carry

The suspension on the Meridian/Sojourn High Road™ Chassis provides a comfortable backpack style carry.

A A deluxe adjustable/removable harness and hipbelt with vented backpanel stows behind a zippered compartment on the back of your pack. To engage backpackable carry, **B** unzip the backpanel of your pack and roll it in on itself, tucking it into the space at the bottom of the pack. **C** Pull the removable harness/hipbelt from its compartment. **D** Insert the male buckles found at the base of the hipbelt lumbar area into the female buckles located at the base of the High Road™ Chassis – an audible click should be heard. To return harness/hipbelt to compartment, reverse this process.

Adjusting the Harness

The harness can be adjusted to fit different sized torso lengths ranging from 16"–22" (41CM–56CM). To adjust, **A** loosen the load lifter straps at the top of the harness. Find the adjustment arrows, **B** on the internal backpanel and, beginning from the top arrow on the mesh backpanel, slide your hand behind the backpanel and between the harness to break the hook-and-loop closure. Slide the harness up or down using the embroidered markers as a guide and re-engage the hook-and-loop closure to hold the harness in place. [Note: The dual slots in the tensioned mesh backpanel allow a greater torso adjustability range]

ErgoPull™ Hipbelt

To operate the ErgoPull™, loosen the webbing enough so you can connect the center buckle. Then grasp the loose ends of the webbing on either side, and pull in and across evenly with both hands at the same time.

Hipbelt/Harness Removal

To remove the pack's hipbelt and harness system, **A** with backpanel cover unzipped, unclip the two buckles found at the top of the harness securing it to the pack's main body and, if already engaged, **B** the two buckles found on the hipbelt lumbar area attaching it to the base of the pack. **C** Find and unclip the two red buckles behind the mesh backpanel securing the hipbelt lumbar area to the main pack body. **D** Slide your hand behind the backpanel to break the hook-and-loop closure and slide the harness/hipbelt system up through the opening in the mesh backpanel to remove. You can now utilize this space for additional gear or dirty clothes. Reverse to reattach harness and hipbelt.

Liquids Pocket

An easy access liquids/ accessory pocket at the top of the pack provides quick access to liquids when passing through airport security.

Rear Panel

A rear panel pocket ideal for magazines or other smaller items keeps you organized along the way and a flip up ID card window keeps your Osprey identified as you roll along.

Panel Load Access / Internal Organization

A dual lockable zippered panel provides access to the main compartment. Once inside, the internal organization consists of dual internal compression straps with fabric wings to hold clothes securely, side zippered mesh and fabric pockets, and a front panel zippered mesh pocket.

Courier Bag Attachment

An integrated hideaway courier bag attachment strap provides quick and secure carry.

Grab handles

Fully padded, reinforced top and side grab handles along with the foot bar/grab handle provide several comfortable carry options.

Carry on Luggage

With the Meridian Day removed, the Meridian 22"/60L complies with the maximum carry-on luggage size specifications required by most U.S. airlines.

MERIDIAN

Unique Features

Meridian: Zip & Clip Removable Daypack

A Unclip the three buckles securing the Meridian Day to the main pack body and pull the red zipper pull to fully detach daypack.

THE MERIDIAN DAY

The Meridian Day is a full-featured, detachable daypack that works well for a day-long jaunt or as a carry-on companion.

Unique Features

- Tuck-away harness with adjustable sternum strap and rescue whistle buckle
- Zippered top crescent pocket
- Dual stretch woven side pockets
- Zippered panel access to full internal organization featuring a padded laptop sleeve, a padded sleeve for eReaders/tablets, and an electronics pocket with pass through port. [Fits laptops to 15.4"/39CM]
- Backpanel sleeve for easy harness/map/document storage
- Zips and clips to Meridian

Capacity & Weight

1220 cu.in. / 20l · 1 lb 6 oz / 0.63 kg

External Dimensions

20" x 12" x 6" · 51 x 31 x 14 CM

SOJOURN

Unique Features

Sojourn AddOns™ Attachment

On the front panel of the Sojourn you will find four D-Rings, A for attaching the Osprey AddOns™ Daylite pack. Push the slider through the D-Ring from underneath and tug on the straps to tighten. Adjusting the tension on the straps will allow you to stash additional gear behind the Daylite.

StraightJacket™ Compression

The Sojourn utilizes foam sidewalls in our StraightJacket™ compression system. The sidewalls securely compress the contents of the pack and transfer weight to the hipbelt, regardless of load size. When the pack is more than 2/3 full, the compression straps buckle across the front of the pack. For smaller loads connect the straps to the two female buckles at the edge of the backpanel.

Daisy Chain Attachment

Dual reinforced front panel daisy chains / attachment points provide additional external storage for quickly needed items.

OSPREY ADDONS™

Customize and protect your pack with Osprey's full line of AddOns.™ For the full lineup, please visit your local Osprey retailer or visit our web site www.ospreypacks.com.
